

# LETTER WRITTEN IN THE YEAR 2070

Article published in the magazine  
"Crónicas de los Tiempos", in April 2002.

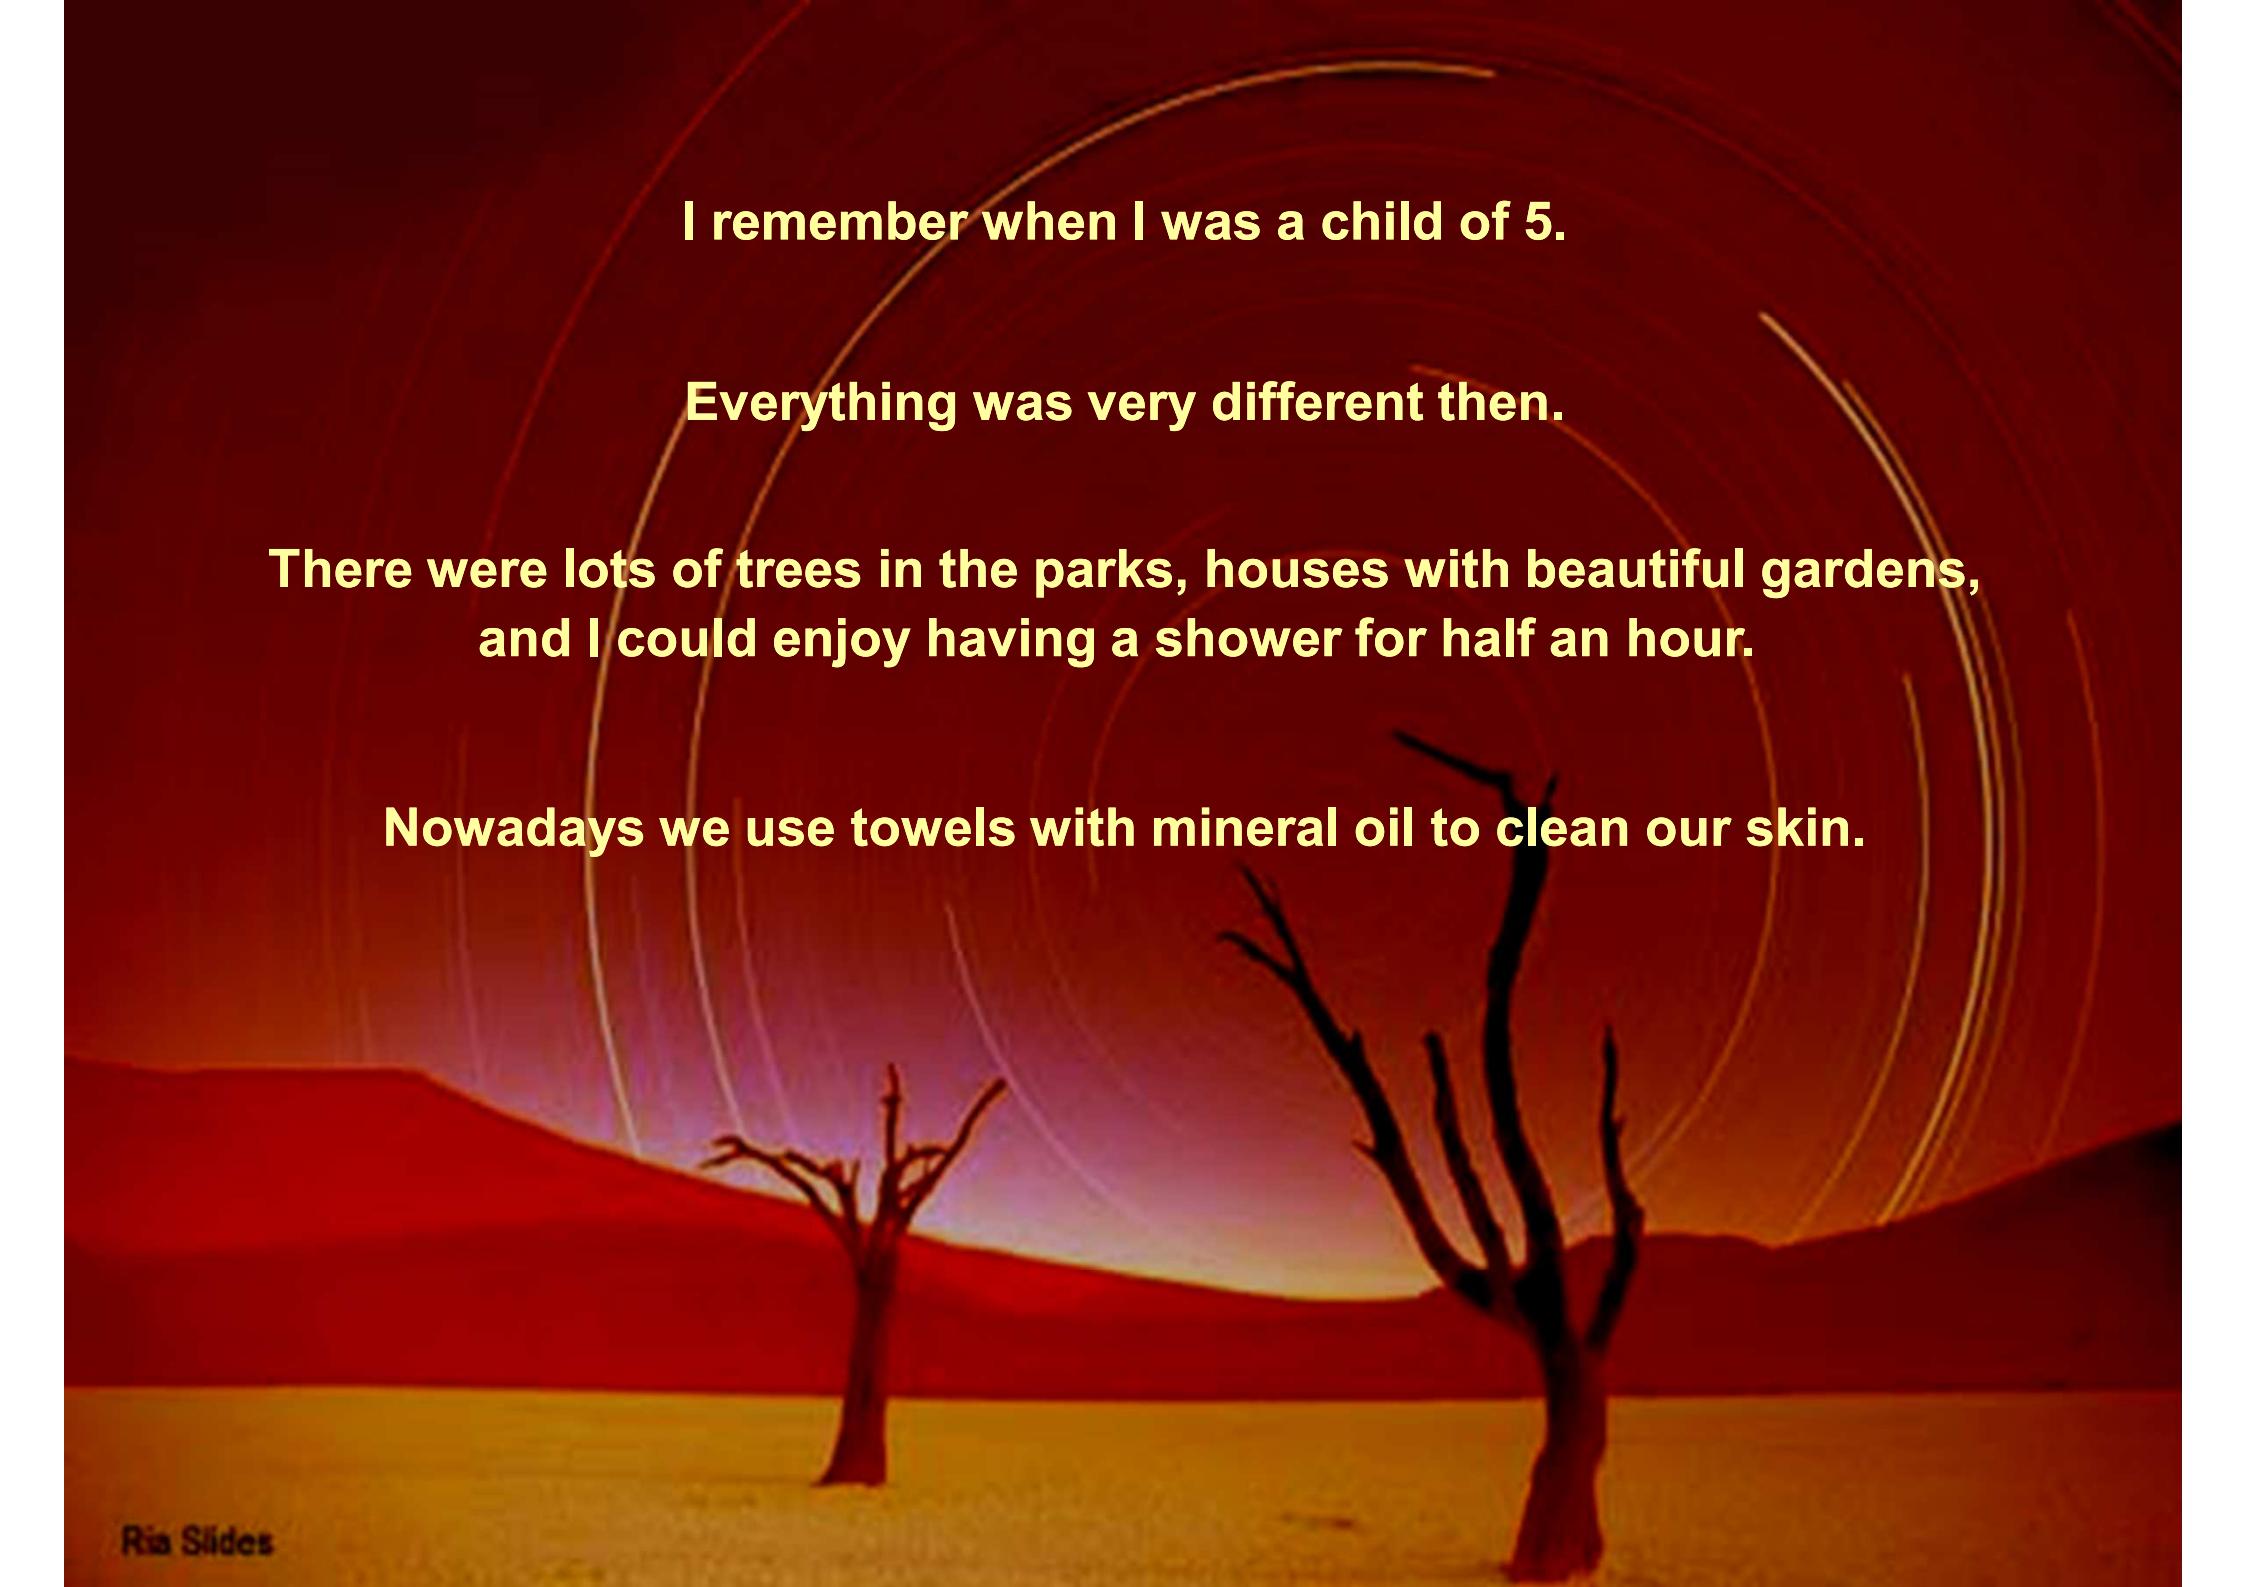

**This is the year 2070**

**I have just turned 50, but my appearance  
is of somebody of 85.**

**I suffer from serious kidney problems,  
because I do not drink enough water.**

**I'm afraid I do not have  
much time left to live.**

**I am one of the oldest people  
in this society.**

**I remember when I was a child of 5.**

**Everything was very different then.**

**There were lots of trees in the parks, houses with beautiful gardens,  
and I could enjoy having a shower for half an hour.**

**Nowadays we use towels with mineral oil to clean our skin.**

A close-up portrait of a woman's face. She has short, dark, curly hair styled in a bun. Her gaze is directed towards the right side of the frame. The lighting is soft, highlighting her features against a dark, reddish-brown background.

**Before, women had beautiful hair.**

**Now, we have to shave our heads  
to keep them clean without the use of water.**

**Then, my father washed his car with  
water coming out of a hosepipe.**

**Now, my son does not believe that  
water could be wasted that way.**

I remember there were  
**SAVE WATER**  
warnings on outside posters, radio  
and TV, but nobody paid attention.  
We thought that water  
was to last forever.

Now, all the rivers, lakes, dams and  
underground water beds are either dry  
or contaminated.

Ric Sides

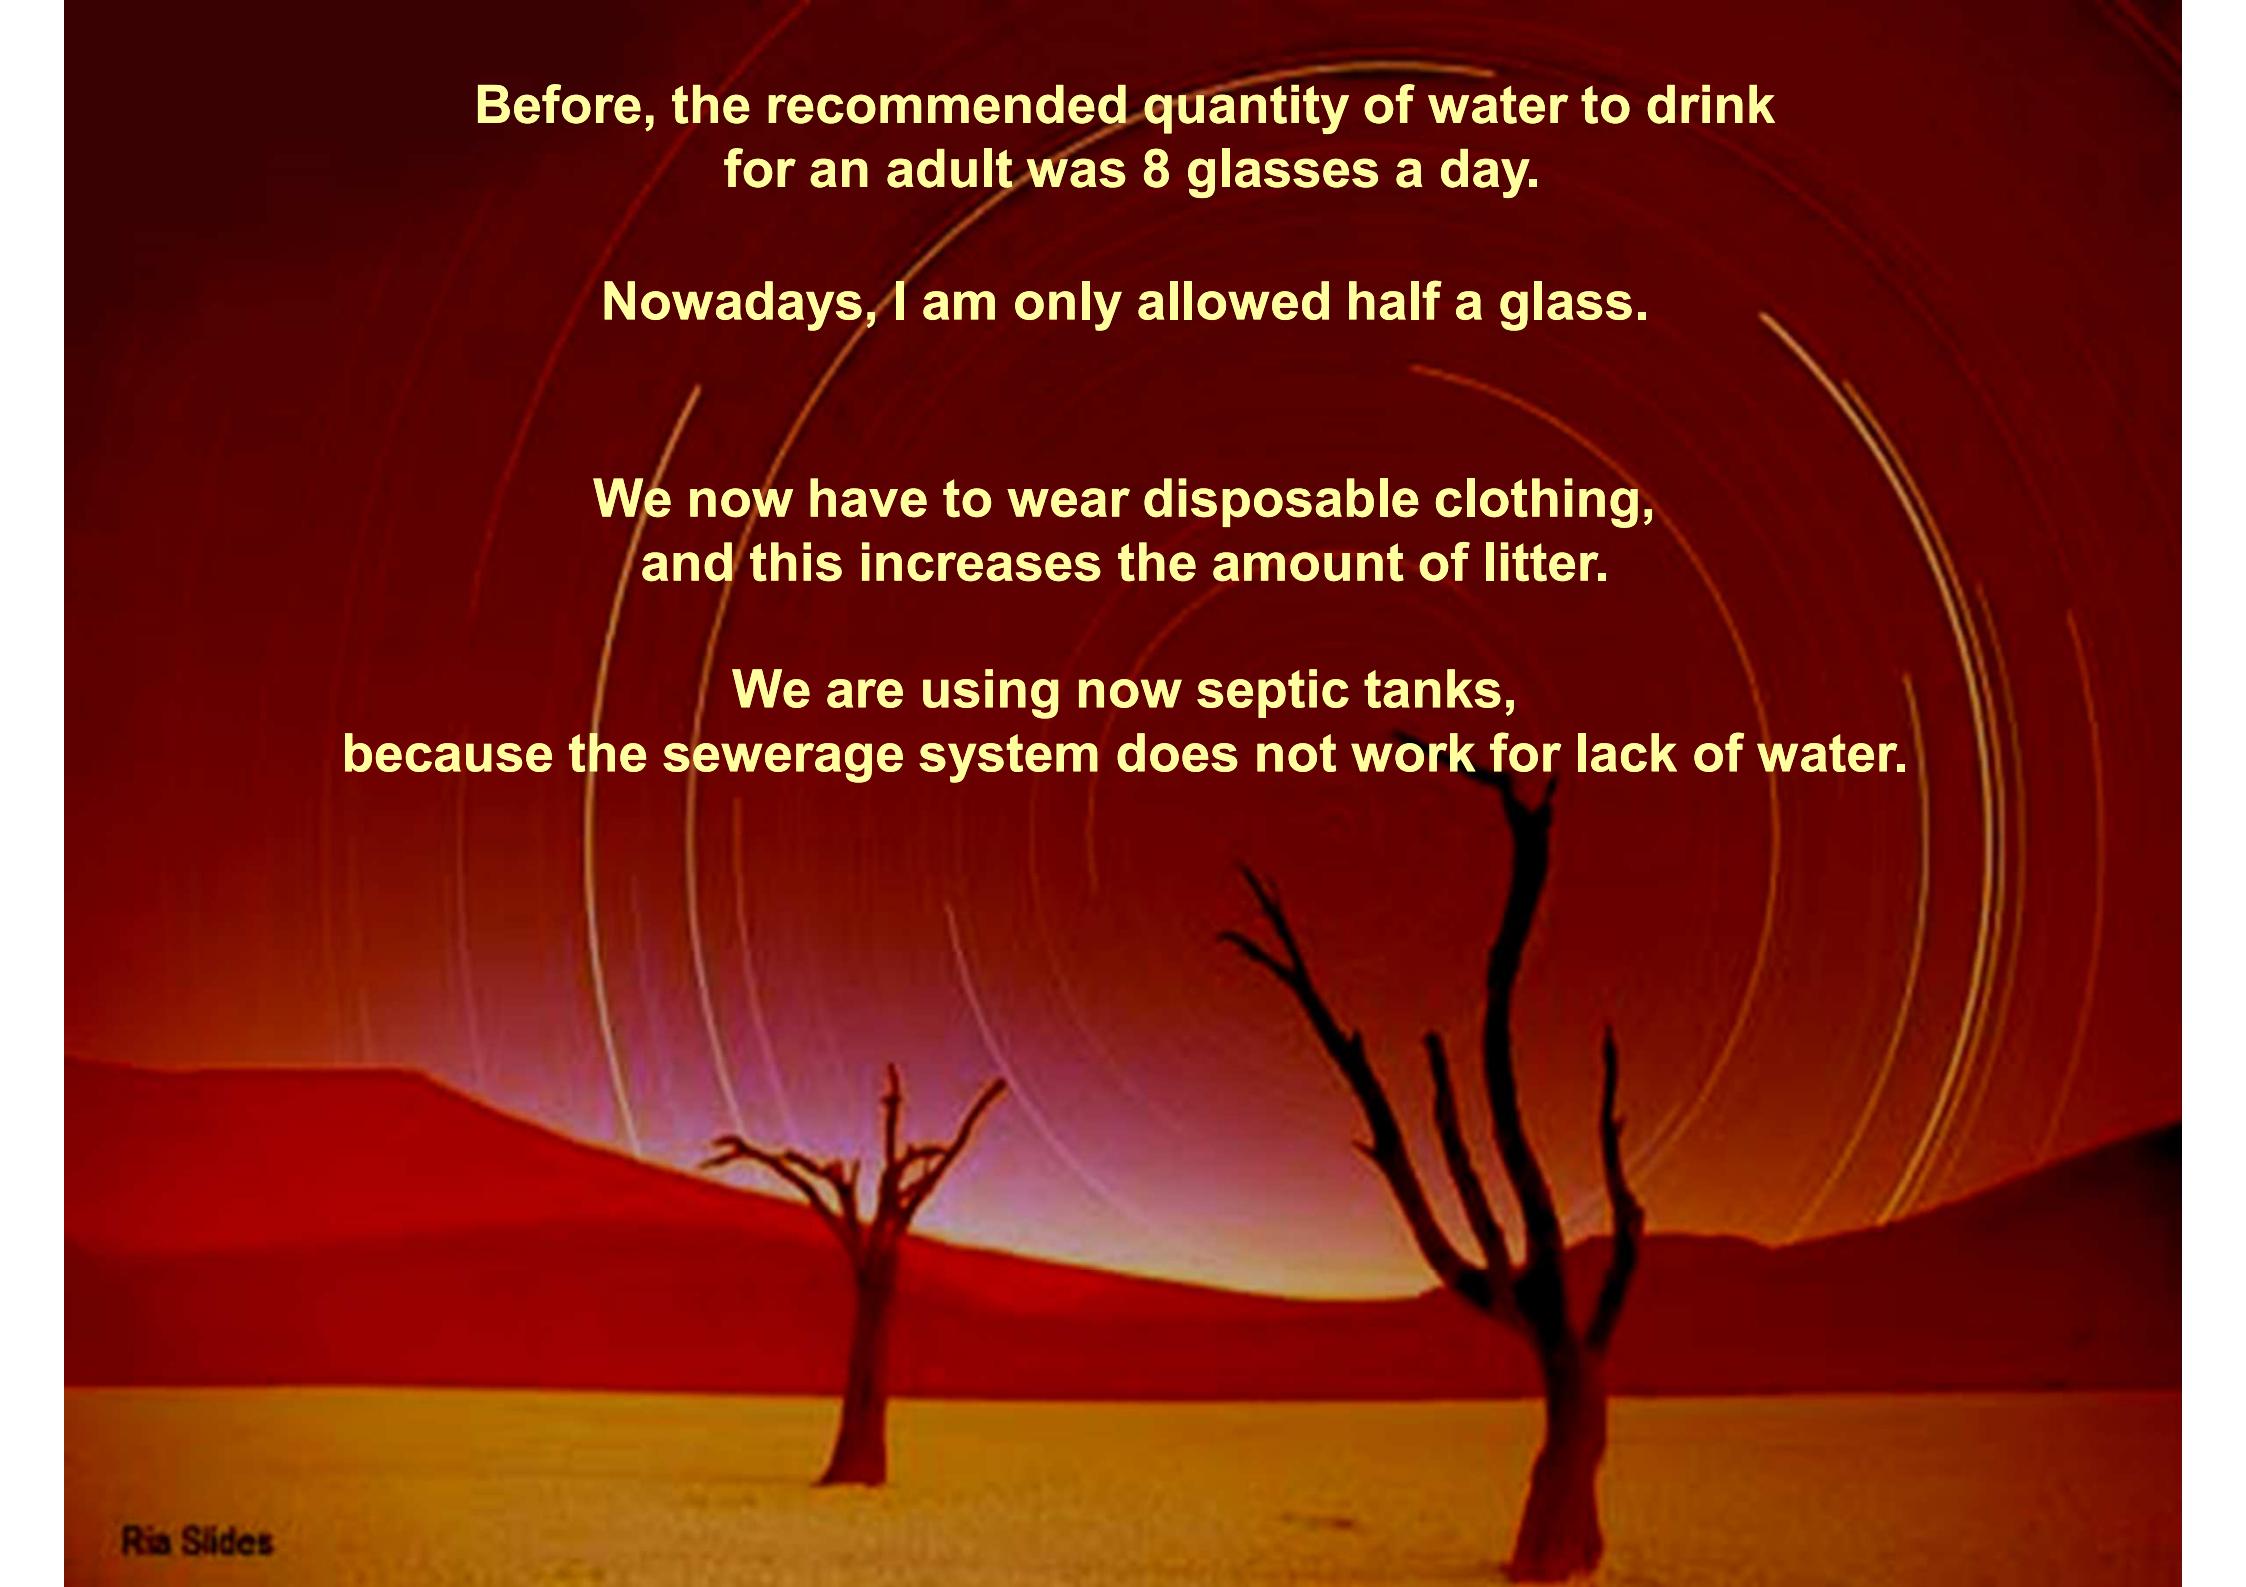

**Industry came virtually to a standstill and unemployment reached dramatic proportions.**

**Desalination plants are the main source of employment and workers receive part of their salary in drinkable water.**

**Assaults at gun point on the streets for a jerrycan of water are very common.**

**Food is 80% synthetic.**

**Before, the recommended quantity of water to drink  
for an adult was 8 glasses a day.**

**Nowadays, I am only allowed half a glass.**

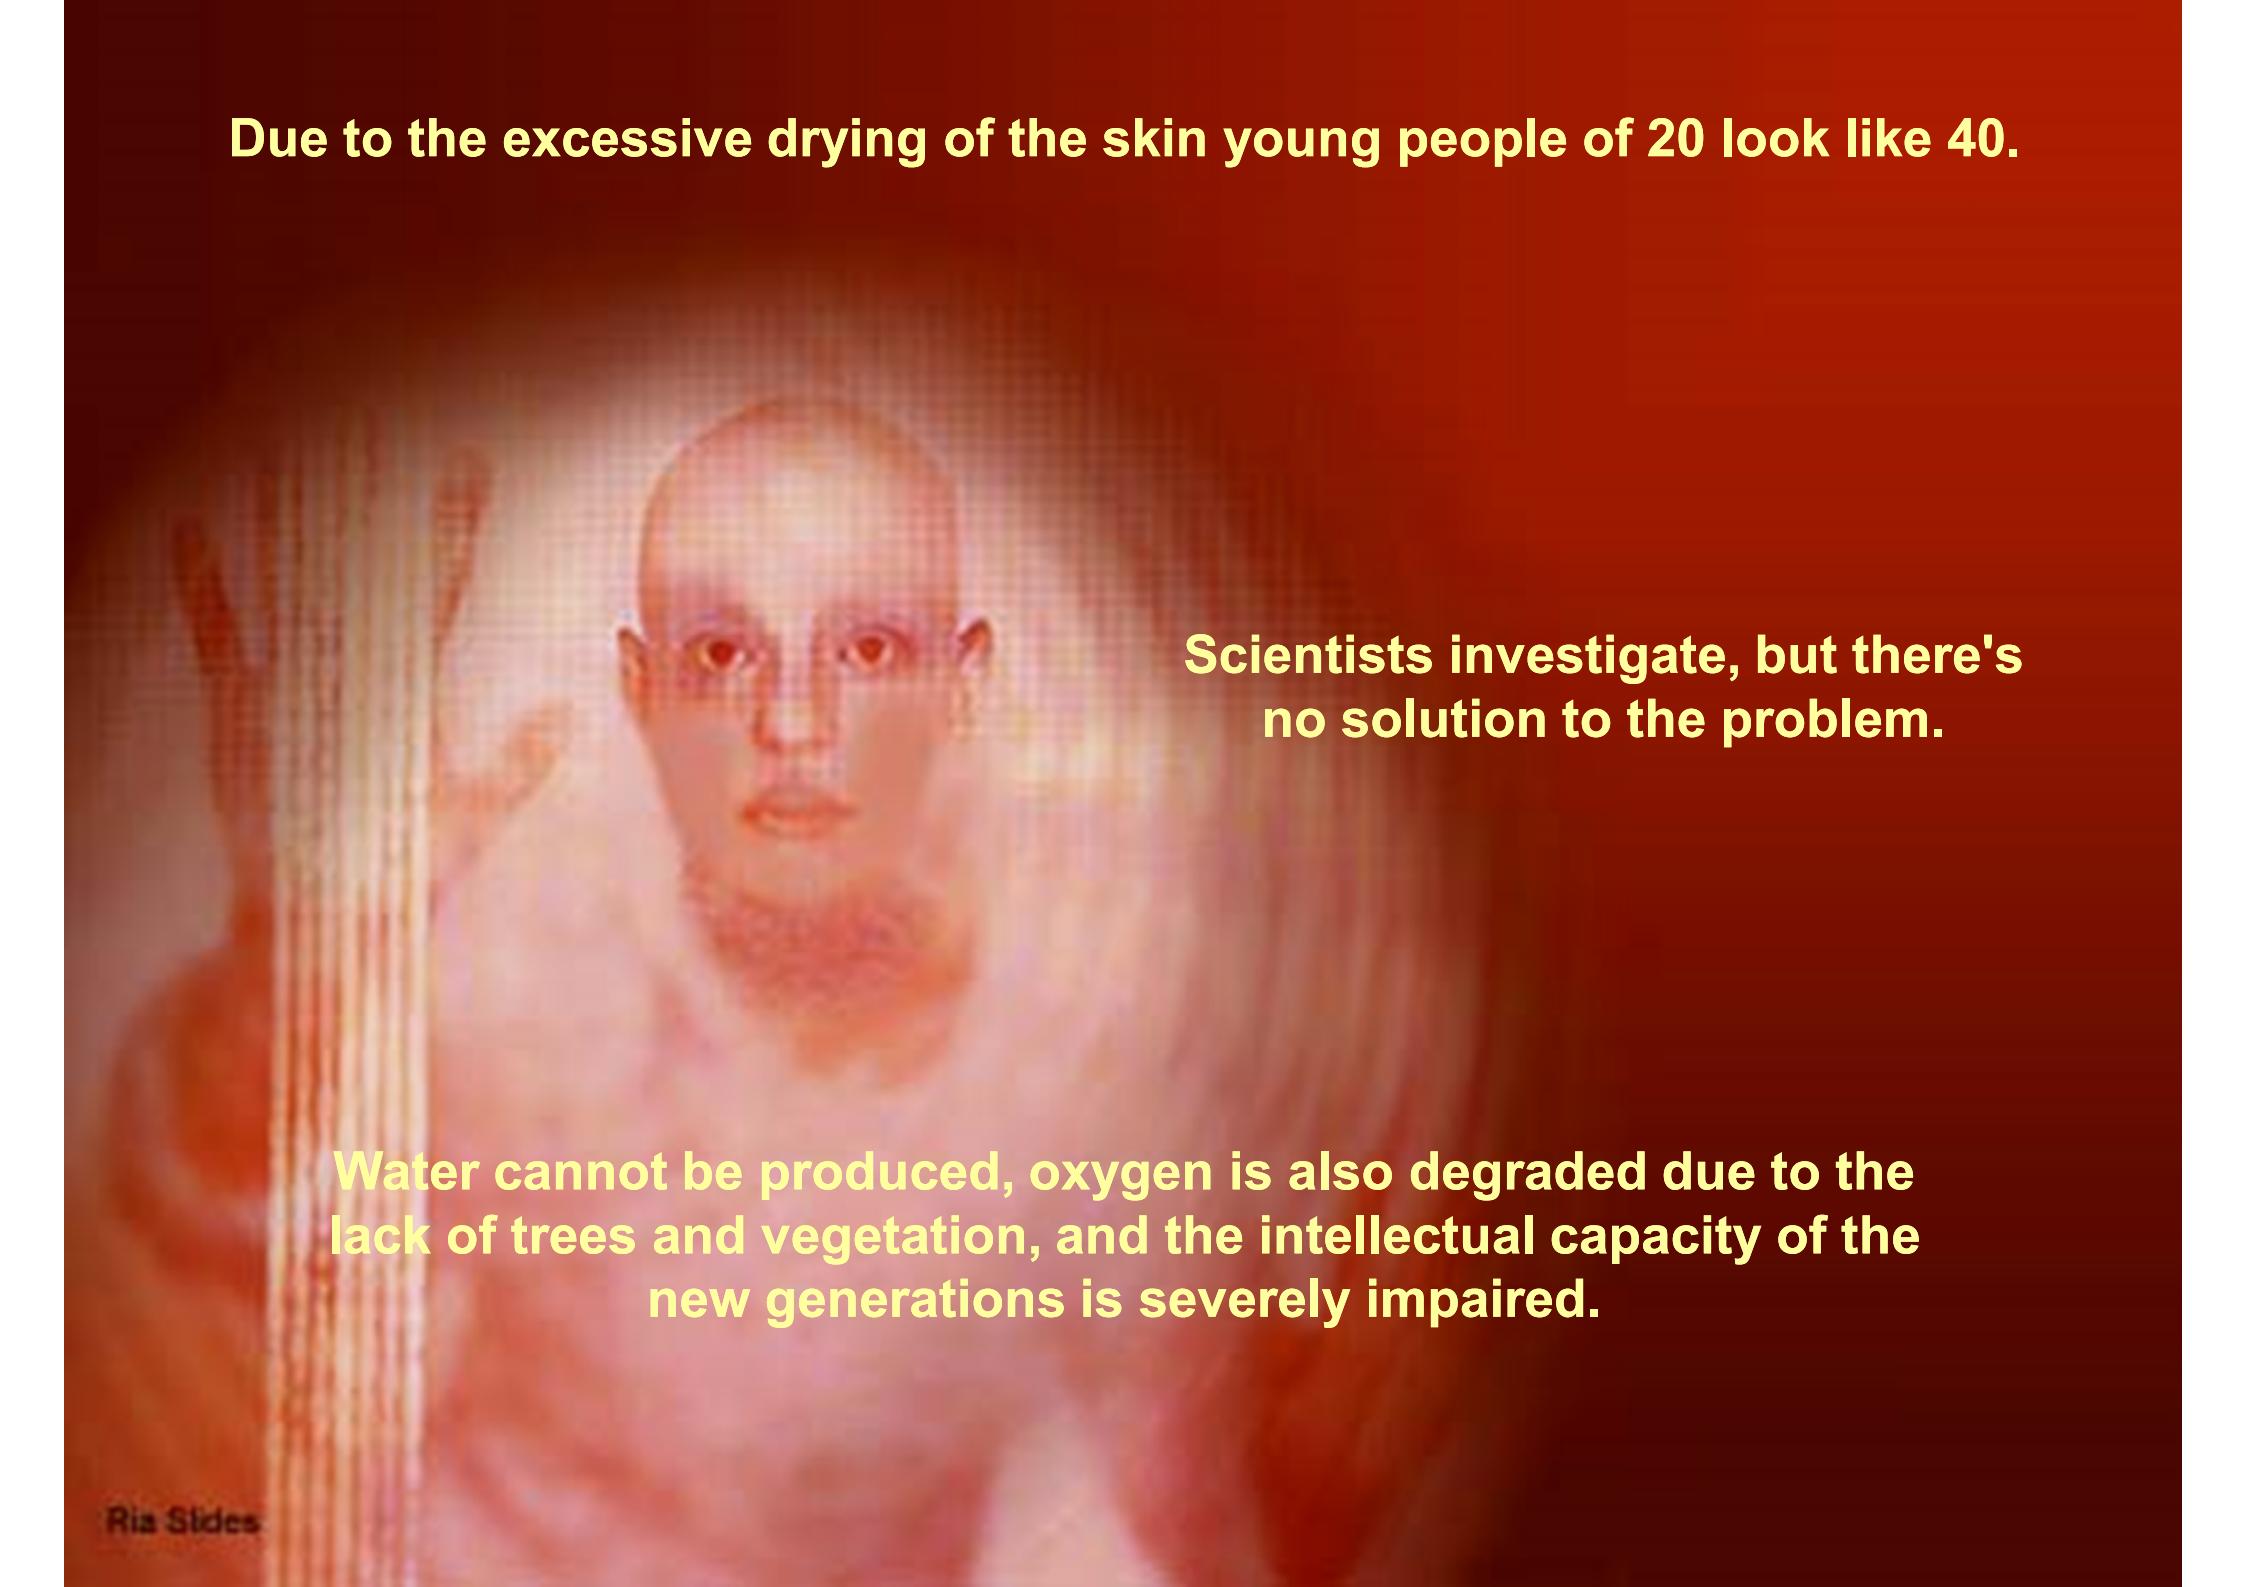

**We now have to wear disposable clothing,  
and this increases the amount of litter.**

**We are using now septic tanks,  
because the sewerage system does not work for lack of water.**

**The outside appearance of the population is horrible: wrinkled, emaciated bodies, due to dehydration, full of sores caused by ultra violet radiation, now stronger without the protective shield of the ozone layer.**

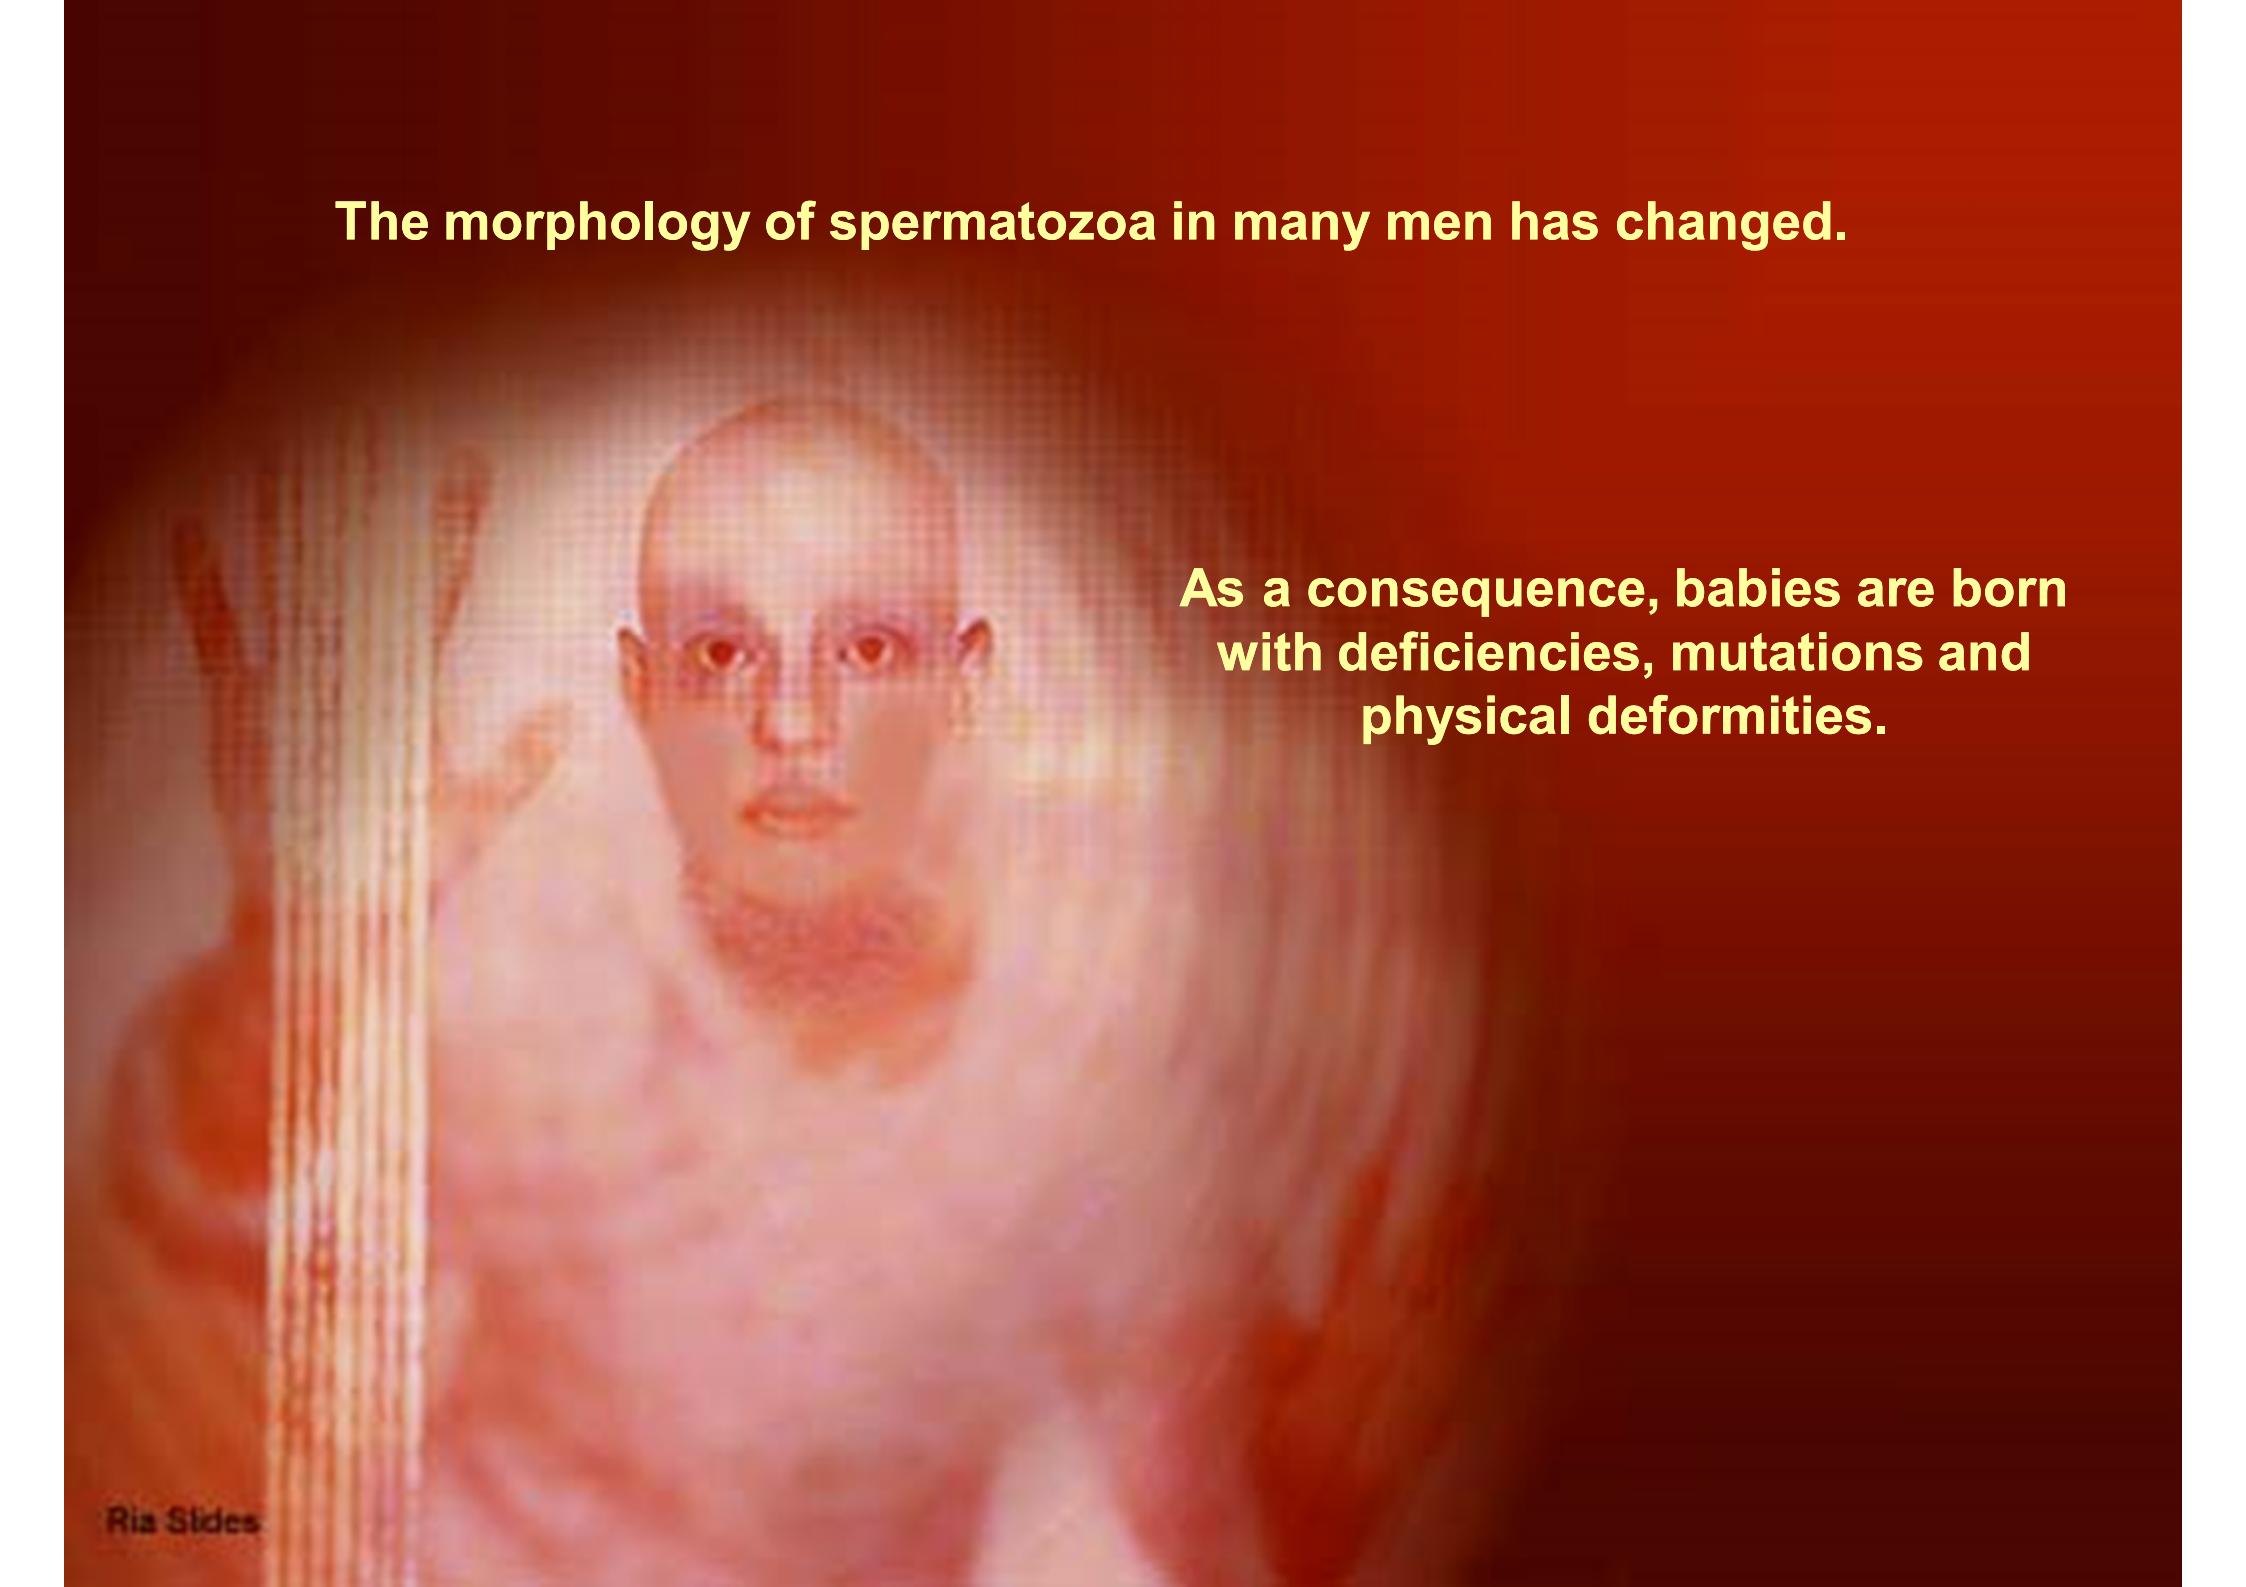

**Skin cancer, gastrointestinal infections and of the urinary tracts are the main causes of death.**

A close-up photograph of a man's face, which appears severely dehydrated. His skin is wrinkled and lacks elasticity, particularly around his eyes and mouth. He has dark circles under his eyes and a generally gaunt appearance. The background is a warm, reddish-orange color.

**Due to the excessive drying of the skin young people of 20 look like 40.**

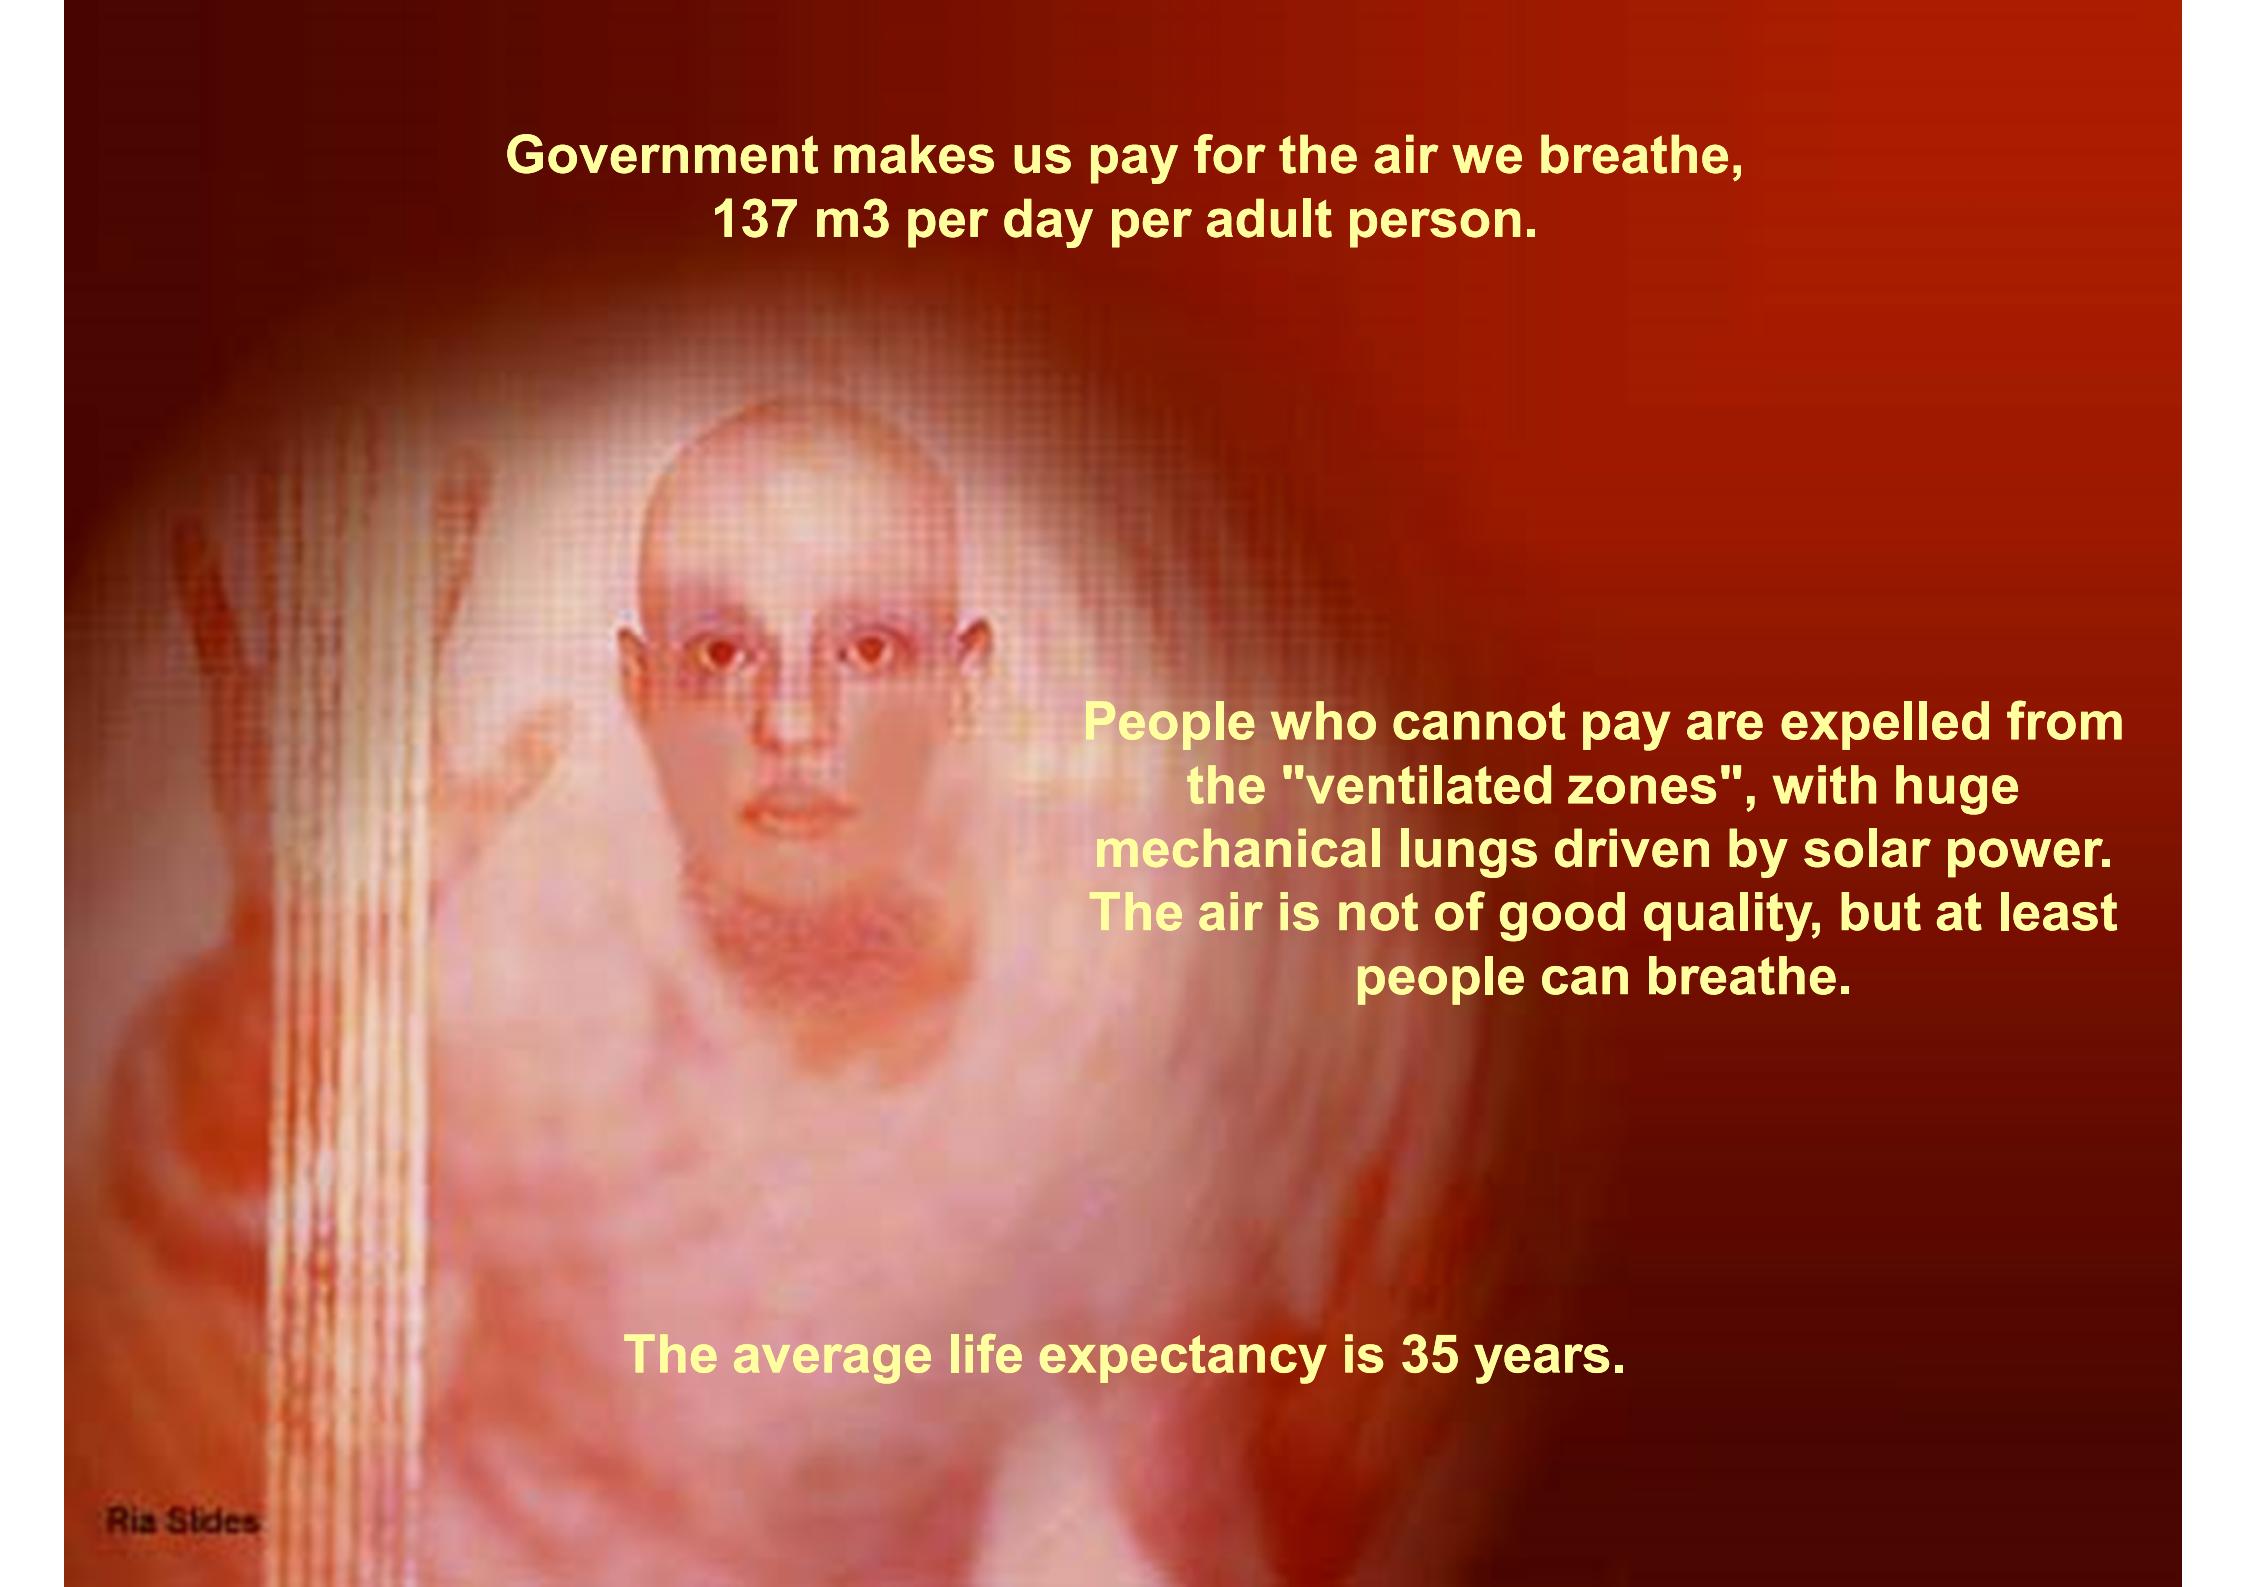

**Scientists investigate, but there's  
no solution to the problem.**

**Water cannot be produced, oxygen is also degraded due to the lack of trees and vegetation, and the intellectual capacity of the new generations is severely impaired.**

A close-up photograph of a man's face. He has a very short, buzzed hairstyle and a well-groomed, dark brown mustache. His eyes are light-colored, possibly blue or green. He is looking directly at the camera with a neutral expression. The background is a plain, light-colored wall.

**The morphology of spermatozoa in many men has changed.**

**As a consequence, babies are born  
with deficiencies, mutations and  
physical deformities.**

A photograph of a man from the chest up. He has a mechanical lung device attached to his left side, which is visible as a large, ribbed, metallic structure. He is looking directly at the camera with a neutral expression. The background is a plain, light-colored wall.

**Government makes us pay for the air we breathe,  
137 m<sup>3</sup> per day per adult person.**

**People who cannot pay are expelled from  
the "ventilated zones", with huge  
mechanical lungs driven by solar power.  
The air is not of good quality, but at least  
people can breathe.**

**The average life expectancy is 35 years.**

**In some countries, where there are still some green zones crossed by rivers, these are guarded by heavy armed soldiers.**

**Water became a very coveted treasure, more precious than gold and diamonds.**

**Where I live, there are no trees, because it seldom rains.  
When it happens to register some precipitation, it is of acid rain.**

**The seasons have been severely affected  
by the atomic tests and by contamination  
from the 20th century polluting industries.**

**We were warned to look after the environment, but nobody cared.**

**When my son asks me to talk about my youth, I tell him about the green fields, the beauty of the flowers, the rain, how pleasant was to swim and fish in the rivers and dams, to drink all the water we could, and how healthy people was.**

**He asks: Daddy! Why there is no water?**

**Then, I feel a lump in my throat!**

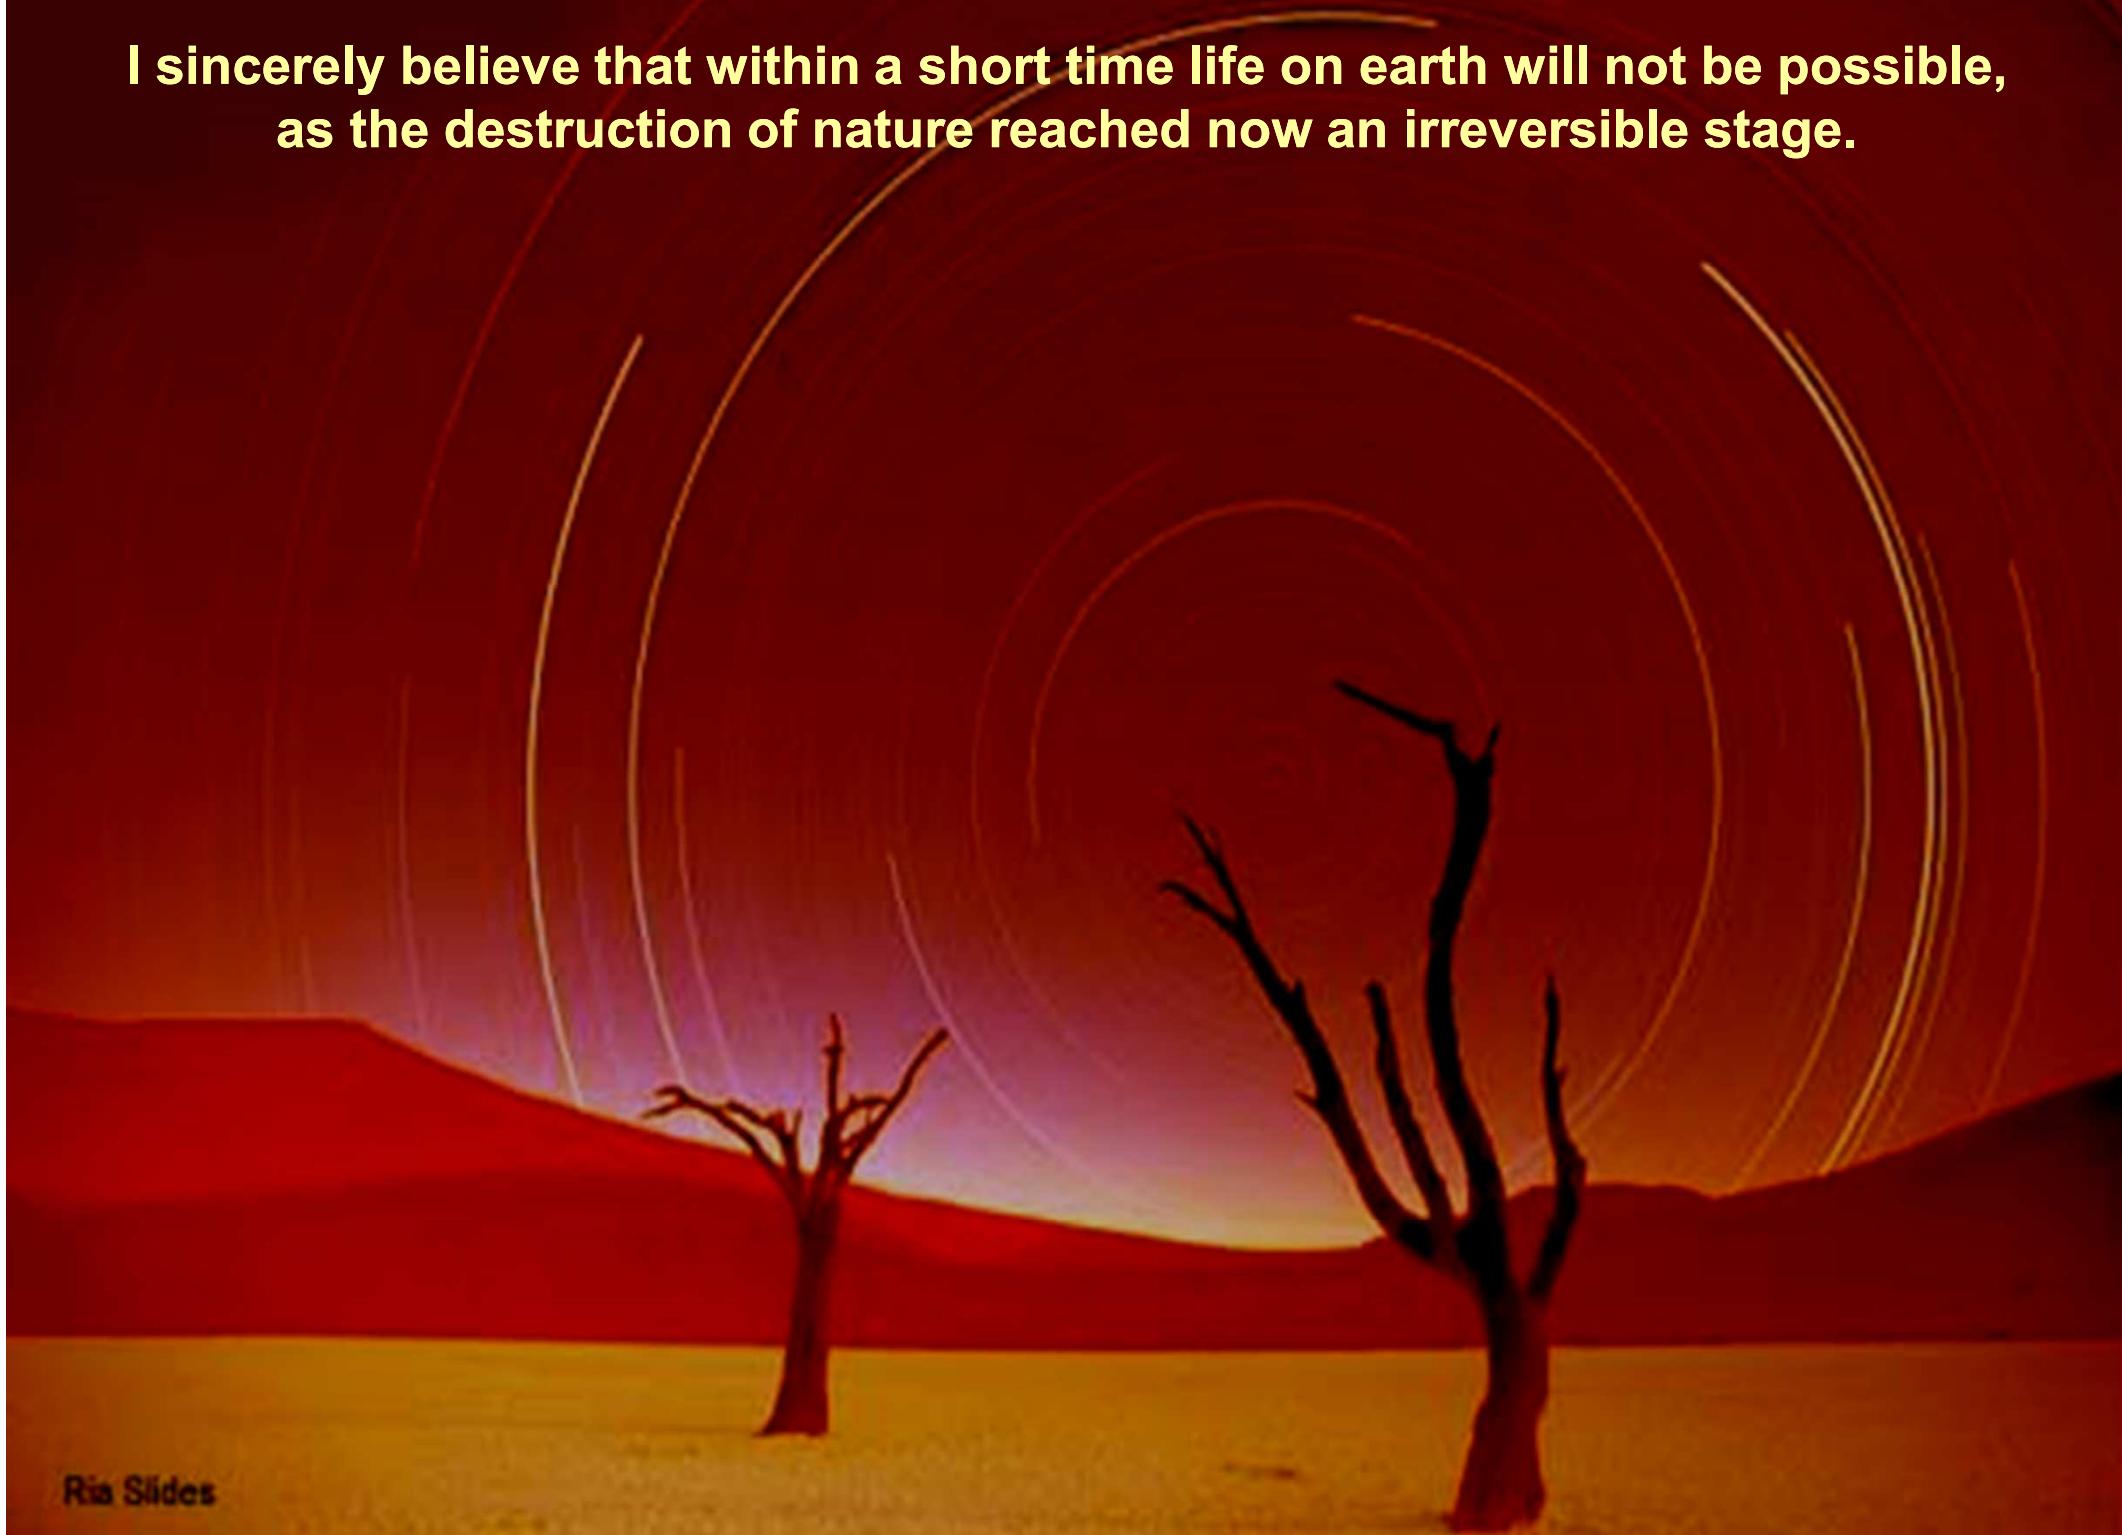

**I cannot help feeling guilty, because  
I belong to the generation who  
contributed to the destruction of the  
environment or simply did not take into  
account all the warning signs.**

**Now our children  
pay a very high price!**

**I sincerely believe that within a short time life on earth will not be possible,  
as the destruction of nature reached now an irreversible stage.**

**How I would like to go back and make mankind understand...**

**...that we still had time to save our Planet Earth.**
